

# THE HARI

HONG KONG

Updated Jan 2022

## ENVIRONMENTAL & SUSTAINABILITY POLICY

At The Hari Hong Kong, we are committed to achieving environmental and social sustainability within the hotel. We are doing our utmost to have a positive impact on the local environment and our wider community by implementing environmental friendly practices and green initiatives in our hotel operations.

## DESIGN & CONSTRUCTION

- Leadership in Energy and Environmental Design (LEED) Silver
- Building Environmental Assessment Method (BEAM Plus) Silver
- Buildings Energy Efficiency Ordinance (BEEO)

## ENERGY & WATER SAVINGS

- Use of LED lights to give longevity and long-term cost saving.
- Electric heat pump to contribute both hot and chill water.
- Energy Card provided in guestrooms to reduce energy consumption.
- Electric vehicle charging stations available in driveway.

## PAPERLESS

- Guest check-in is conducted using tablets no registration paper.
- Payment approvals are processed electronically.
- In-room dining menu and guest information are displayed on TV instead of paper directories.
- Online publications are available for guests through PressReader instead of newspapers.
- Recruitment is done through Spark Hire video interview software for initial scanning of candidates. Application forms are digital and completed by applicants online.
- BIPO HR system for time/attendance recording, rostering, leave applications and hotel announcements. This has removed all associated paperwork and reduced notice board space.

# THE HARI

HONG KONG

## NO SINGLE USE PLASTIC

- The Hari's signature scent is used for bathroom amenities in refillable pump action bottles.
- Toothbrushes that are made from sustainable bamboo.
- Nordaq's filtered water solution in all guest areas to avoid disposable water bottles.
- Drinking straws are made from potato starch.
- Vegware plant-based compostable food packaging made from renewable, lower carbon, recycled or reclaimed materials.
- Eco-Spirits collaboration means house pour spirits are purchased in volume containers reducing the quantity of bottles delivered and disposed of.

## WASTE DISPOSAL

- ORCA innovative technology to turn food waste into an environmentally safe liquid which significantly reduce the harmful emissions from the traditional truck and bin collection process.
- Waste cooking oils are recycled.
- Glass/Cardboard/General waste separation and collection.

## COMMUNITY SUPPORT

- Support a range of local and global charitable projects and initiatives through providing monetary or in-kind donations.
- Encourage staff to donate time in volunteering for worthwhile causes and organize regular volunteer service to the local community.

## HONOURING GUEST FEEDBACK

- Welcome guests to inspire us with their ideas for improvement regarding sustainability and action accordingly.

We recognize that our choice regarding our business practices have an impact on both the community and also the environment. As sustainability is one of our highest priorities in a rapidly changing world, the hotel will continue to work with **It Must Be Now** to reduce our carbon footprint and help communicate these efforts to travelers who are conscious about sustainable accommodation and travel experiences.

Rory Slater  
General Manager
