

Sustainability Policy

To be reviewed January 2027

The Hari is committed to improving its environmental, social and economic sustainability performance by integrating responsible practices across its operations and guest experience, supported by EarthCheck, a recognized benchmarking and certification programme.

Located at Chesham Place in the discreet and quintessentially British neighbourhood of Belgravia, The Hari is moments away from Harrods and the luxury shops of Knightsbridge, and within walking distance of The Royal Albert Hall, Buckingham Palace, and Hyde Park. The Hari has 85 designer bedrooms, 14 of which are luxury suites. il Pampero is The Hari's in-house restaurant, offering authentic Italian cuisine. The Hari's meeting room, The Muse, is located on the first floor of the hotel. There is also an on-site gym, bar, and garden terrace.

At The Hari, we recognise the intensifying need for businesses to focus on enhancing their sustainability practices through robust strategy and policy development, as well as the implementation of tangible initiatives (which exist to reinforce the United Nations Agenda 2030 Sustainable Development Goals). We also recognise the activities of our operation have the potential for negative impacts on the environment and community if not properly managed. We are committed to mitigating environmental impacts (such as energy and water savings, waste reduction, and carbon footprint reduction), increasing stakeholder relationships and support, and maintaining transparency and ethical standards in our business practices. Present in our sustainability action plan, we are committed to continuous improvements measured against the annual Benchmarking Assessments Earth Check.

As a family-owned hotel, The Hari is dedicated to growing in an organic and sustainable manner. We intend to regularly assess and implement a multitude of sustainability initiatives, which will continue to improve and support us in reducing our consumption, protecting our environment, honouring our local communities, and doing our part to fight the emerging climate crisis.

The Hari will comply with all relevant legislation and regulations, including labour laws, aiming to achieve the best international practices. As such, we have appointed our Sustainability Manager, Angela Montebello as the EarthCheck controller, whose responsibility is to improve the hotel's sustainable performance. Special consideration will be given to employing and empowering local employees, and wherever possible sustainable products and services will be sourced locally in accordance with Fair Trade principles. We encourage staff to present our commitment to sustainability to all key stakeholders including guests, suppliers, and contractors.

Francesco Sardelli,
General Manager
